

Start your safety plan now

The Occupational Safety Health & Bureau is holding classes to help you assemble your safety programs. These are hands on classes; **you will leave the class with your safety programs in hand.**

A formal safety plan will help keep your employees safe. It is also necessary to qualify for the [Montana State Fund Small Business Group](#) SB 192. Your policy may be eligible for this new group. The required programs must be implemented a year in advance.

So for example, if your policy expires on July 1, 2010 **then you must have the above requirements implemented by July 1, 2009.** If your policy expires on August 1, 2010 then you must have the requirements implemented by August 1, 2009. If your policy expires on September 1, 2010 then you must have the requirements implemented by September 1, 2009 and so on. You get the picture?

Class Dates

June tba	Helena College of Technology
June 9	Bozeman College of Technology
